Guideline for video conferencing with CISCO Jabber Video

Here you will find a short guideline for the installation and usage of the Jabber video conferencing software.

Requirements:

- Notebook with Windows or Mac OSx
- Cable internet connection (WLAN is not recommended and might get problems)
- Built-in or external video camera
- Built-in microphone and speakers (recommended headset)
- Installed CISCO Jabber Video Client

Download and Installation of CISCO Jabber Video client

http://tms.rzg.mpg.de/public/   For Windows: JabberVideoSetup… .exe
                                        For Mac OSx: JabberVideo… .dmg

Follow the installation wizards with standard settings.

Login Settings

When starting the Jabber Client please choose the settings from this menue ⚒ beneath the password field. Choose "Sign-In Settings". Use this addresses for "External Server" and "SIP Domain" **vc.mpg.de**

Please use the login information you received via email from our IT-Service group.

Servers

Internal Server

External Server
vc.mpg.de

SIP Domain
vc.mpg.de

Menue bar in the conference

Show/Hide self-view | Camera on/off | Microphone on/off | Speaker on/off | Fullscreen | Share screen/presentation | End call

More information about using the Jabber client please have a deeper look to the User Guides you'll find under the same link above.
